The Compact Series Advantage

01

One tank instead of two

Our anaerobic digester and treatment unit are combined in a single tank, reducing the number of tanks and components on site.

02

Lower overall costs

Only one tank to supply, set and connect will further reduce equipment, labour and coordination costs.

03

Fast and simple installation

The system comes completely pre-assembled. Connections to the tank and disposal bed are all that's needed.

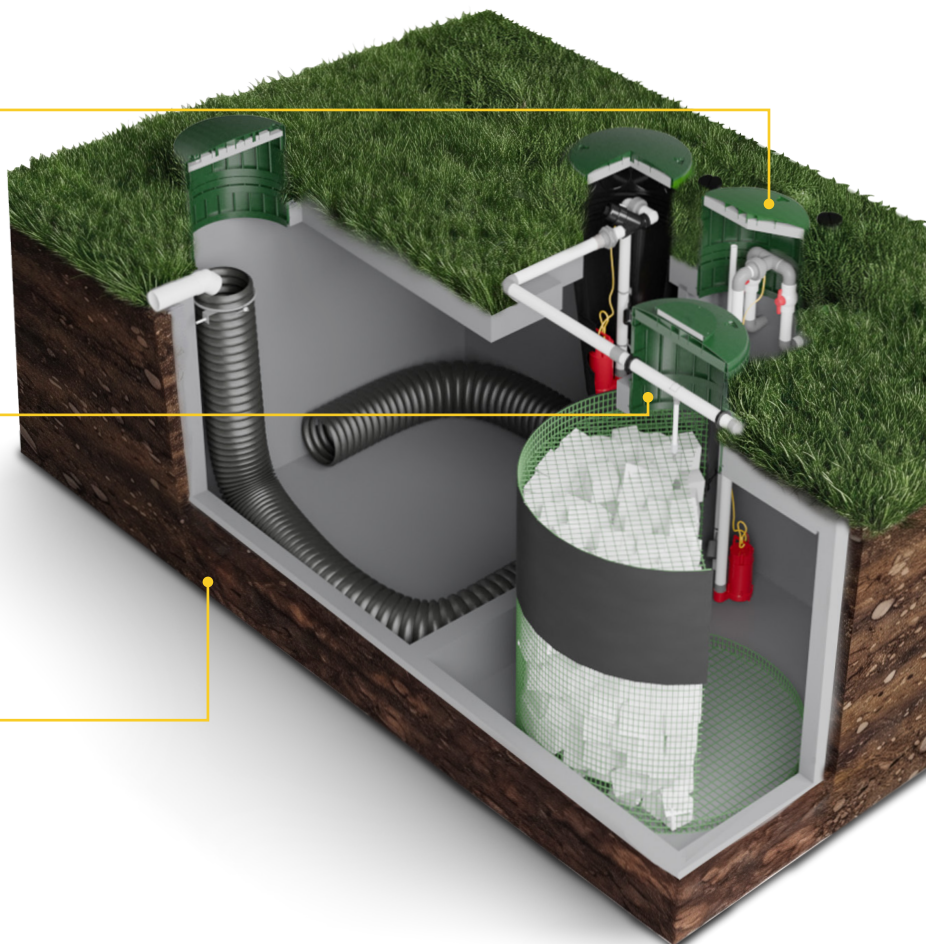

04

No treatment compromise

A fully BNQ certified Waterloo Biofilter system in a smarter package with full performance.

Easy for installers. Economical for homeowners.

The Compact Series is designed to make projects easier to **install**, easier to **service** and easier to **support** over the life of the system.

Why installers choose it

- ✓ Comes pre-assembled, ready to install
- ✓ Fewer components to install and connect
- ✓ Easy above-grade service access
- ✓ Compact design for tight and challenging sites

Why homeowners like it

- ✓ Certified performance with a compact footprint
- ✓ Only access lids remain visible
- ✓ Backed by trusted Waterloo Biofilter performance
- ✓ Supported by Ontario's largest service fleet
